

(1, 3) to (8, 8) — ROS

(1, 3) to (8, 8) — Maude

The figure displays a heatmap on a 10x10 grid. The x and y axes are both labeled from 0 to 10. The background is a solid red color. A cluster of cells in the upper-left quadrant (roughly between x=1-5 and y=1-5) shows varying intensities. A path of cyan dots is overlaid on this cluster, starting at (1, 5), moving up to (1, 3), then right to (2, 3), and finally up to (2, 2). A color bar on the right indicates values from 0 to 600.
