A heatmap visualization of the 'RCS' variable. The x-axis is labeled '(1, 10)' and the y-axis is labeled '(1, 1)'. The color scale ranges from 0 (dark purple) to 1200 (yellow). The plot shows a grid of values with a prominent diagonal band of higher values (yellow/green) and a large area of low values (dark purple) in the upper right quadrant. A red line with circular markers traces a path through the grid, starting from the bottom left and moving towards the top right.
